

Open steel design and graphics

# Osdag

## Pre-Launch Workshop

04-05 June, 2016  
IIT Bombay

## About the workshop

Open steel design and graphics (Osdag) - is a GUI-based cross-platform free and open-source software for the design (and detailing) of steel structures, following the Indian Standard IS 800:2007.

The primary objective of this “pre-launch” workshop is to expose domain experts and prospective Osdag users to the current version of this software, and to obtain their feedback. This feedback will enable the developers to come out with a more user-friendly and useful version of Osdag at its projected launch.
