

FINAL MAP - River networks and catchment area for Sutlej River Basin.

Data:

I have created river networks and catchment area for the Sutlej river basin in Himachal Pradesh. I have used QGIS 2.18 interface for this map.

Sutlej River is the major part of the Indus river basin. It has its starting point in Himachal Pradesh at Shipki and then flows in south-west direction covering various places as Shimla, Kullu, Solan, Mandi and Bilaspur districts. In its route, the river is also separated in various tributaries entering the nearby places.
