

Map of Natural Resource/Manmade Features in South Goa

Map description and analysis

Introduction:
South Goa is one of two districts that comprise the state of Goa in India, within the region known as Konkan. It is bounded North Goa to the north, the Uttara Kannada district of Karnataka state to the east and south, while the Arabian Sea forms its western coast

Tourism:
Soulful and Serene, South Goa offers you a heady mix of exotic and sandy beaches, churches and temples rich in history, glimpses into Portuguese culture, mind blowing sea food, undiluted lush greenery, and an undeniable romantic vibe.

Sanctuary:
Bhagwan Mahaveer Sanctuary, a 240sq.km of the protected area located in the Western Ghats, in Sanguem taluka, is the biggest of all the wildlife sanctuaries in Goa. Along with being rich in flora and fauna, it encloses numerous temples from the Kadamba Dynasty and the famous Dudhsagar Waterfalls.

A perfect representation of delicate ecosystem of the Western Ghats, the Cotigao Wildlife Sanctuary is located in the Canacona Taluka, South Goa. This 105sq.km the large park is called a tree lovers paradise and is at its blooming zenith.

Rivers:
Rivers of Goa originate in the thick forests, many of them discharge into the Arabian Sea. The landscape of South Goa is characterized by a small area dominated by these rivers which are an intricate system of wetlands, tidal marshes, and cultivated paddy fields interconnected by canals, inland lagoons, and creeks governed by regular tides.
