

# Title: Resources required for Supplementary Business in Pune District

# Map description and analysis

## Introduction:

Business planning is necessary for economical growth of farmers. As there are some drought prone areas in Pune district hence for socio-economic development of farmers supplementary business is essential. Factors like location, transport, availability of markets and industries, labourers are important to establish any business.

## Poultry farming

Poultry farming is raising Hen, Cocks, Ducks for the purpose of meat, eggs production, breeding, waste management. It is required to build poultry away from city and low lying area but it should be near to the markets. Junnar, Shirur & Indapur are ideal sub districts for poultry farming as these sub districts have large number of poultry animals and labourers, barren lands, high connectivity and availability of markets.

## Dairy

Dairy farming is raising Milk producing animals and making dairy products out of it. Dairy farms can be locate near to sub urban, connectivity, markets, pollution free area, high vegetation area. Bhore, Baramati, Indapur, Daund are best for dairy farming as these sub districts have large number of dairy animals and labourers, scrub lands, sub urban areas and availability of markets.

## Fishery

For fishery one can make artificial ponds in barren land having soil which has good water retention capacity. Regions with high rainfall and large availability of land can be utilize for this. Maval, Mulshi, Velhe, Bhore, Purandar, Indapur are good for fish farming.
