

Methodology

➤ ISRO Data used

- The ISRO map archives have been used.
- The current vegetation area's live data have been used from Bhuvan.

➤ QGIS Steps

- Importing a general map.
- Focusing down to the topic specified area(Andaman).
- Adding layers to the area.
- Layering polygons to the area according to the vegetation data available from ISRO resources.
- Differentiating the vegetation types by color codes.
- Adding legends to the map accordingly.
